

4.2.4 Number per day usage of library by teachers and students (foot falls and login data for online access) (Data for the latest completed academic year)

Methodist College of Engineering and Technology Library provides in house, photocopy, Printout, CAS, SDI and internet facilities in addition to lending facilities on day to day basis.

The library usage by teachers and students physically is being recorded in a login register maintained in the library. The usage count is reduced due to pandemic during A.Y 2020-21 which is calculated as 100 per day.

During 2020-21, remote access to the e-resources of the library is made available to its users through access points. The college library provides access to e-Journals, e- books etc. Almost all the members of library (U.G and P.G students, faculty, research scholars) are logging into the library using their login credentials every day for their reference. Being a multi-user platform, one log-in is used by multiple users, hence per day number of users accessing these e- resources cannot be exactly computed.

In addition, on specific request from users for some specific journals(eg. IEEE transactions, Elsevier etc) an abstract of the respective e-journal is given to the librarian and the librarian downloads the entire text for the users and sends them via e-mail.

The method used for computing usage data of students and faculty coming to the library, circulation data, use of reference books in library and photocopy services, etc is been recorded as below:

$$\text{The Percentage of Usage in a day} = \frac{\text{Number of teachers and students using Library per day}}{\text{Total number of teachers and students}} \times 100$$

Due to Pandemic period, physical usage of library by students & faculty is less.

Scanned Copies of Random Pages of the Library Logbook is enclosed.
