Date: 09/11/2022

This is to inform all the students and faculty members of the Department of Computer Science and Engineering (CSE) that the Project review committee for the academic year 2022-2023 has been constituted. The committee will be responsible for evaluating and approving the project proposals submitted by the students for their final year projects. The committee will also monitor the progress and quality of the ongoing projects and provide feedback and guidance to the students and supervisors.

The members of the committee are as follows:

S.No	Name of the Faculty	Designation
1	Dr. P. Lavanya	Chairman
2	Dr. Ramakanth Mohanty	Coordinator
3	Mr. T Praveen Kumar	Coordinator
4	Dr. M Sharada Varalakshmi	Member
5	Dr. Diana Moses	Member
6	Dr. Khaleel Ahmed	Member
7	Dr. Moulali	Member
8	Dr. P. Shruthi	Member

[Handwritten signatures and initials next to the table]

The students are requested to submit their project proposals in the prescribed format to the committee. The committee will review the proposals and communicate their decision on the projects. The students are advised to follow the guidelines and instructions given by the committee and their supervisors for successful completion of their projects.

Dear Members of Faculty of Engineering,

It is proposed to convene an online meeting on 25.01.2022 at 2:30 p.m. with the following link;
<https://meet.google.com/yrf-jzzh-jbq>

Hence, you are requested to join the meeting to provide your feedback on the following agenda:

1. Revised almanac for all UG & PG programmes of odd semesters
2. Minor changes in PG rules & regulation w.e.f. a.y. 2021-2022
3. Planning for the even semesters of all UG & PG programmes.

-Dean, FoE.

Minutes of the offline meeting convened in the Office of Dean, FoE, O.U. on 07.05.2022 at 3:30 p.m.

The following members were present

1. The Dean, Faculty of Engg. OU
2. The Principal, MVSR, Hyderabad
3. The Principal, MJCET, Hyderabad
4. The Principal, DCET, Hyderabad
5. The Principal, Matrusri, Hyderabad
6. The Principal, Methodist, Hyderabad
7. The Principal, Stanley, Hyderabad
8. The Principal, NSALK, Hyderabad
9. The Principal, ISL, Hyderabad
10. The Principal, NGIT, Hyderabad
11. The Principal, Lords, Hyderabad
12. Dr. Zahoorullah, S M D CEO, OUTBI-Special Invitee
13. Dr. R. Hafeez Basha, Incubation Manager, OUTBI-Special Invitee

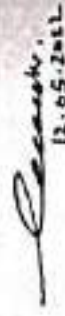

1. As per the Minutes of the meeting with The Principals of Affiliated Engineering Colleges of OU held on 11.03.2022 at 2:00 p.m. in online mode (<https://meet.google.com/mex-rfzc-yyj>) The Dean, FoE discussed with all the Principals of Affiliated Engineering Colleges of OU on the possibilities to bring the academic program back to track. Hence, it was proposed to allot

5 Lectures per week for each theory course instead of 3 Lectures per week to reduce the duration of the semester from 16 weeks to 10 weeks for both B. E. and M. E. 2 semester students as the program contains only 4/5 courses.

2. The detailed almanac for the above programmes is appended herewith.

4. The internships for UG 6 semester students can be planned during 25.07.2022 to 15.08.2022.
5. The Faculty Members be given summer vacation in a staggered mode during 25.07.2022 to 15.08.2022.
6. As there is lot of confusion regarding the correct version of the syllabus to be followed, the one which is approved in the FoE and uploaded on the O.U. website is to be taken as authentic. Hence, the Chairpersons BoS should take adequate care in sending the correct version to the office of Dean, FoE.
7. The template for the proposed scheme of instructions for PG programmes is annexed herewith for discussion in the respective BoS meetings for the possible implementation.
8. The OUTBI Officials have briefed regarding their Advisory collaboration activities for the Entrepreneur Development Cell in all Affiliated Engineering Colleges of OU. Moreover, the ISL College of Engineering has exchanged their papers of MoU with OU-TBI in the same meeting.

The Dean, FoE thanked all the members for their active participation.

3. Project Overview / Background:

• Introduction:

- The Taxi Monitoring System mainly focuses on monitoring a Taxi/Vehicle which is fitted with this system inside it. Once this system is activated, it will keep on continuously monitoring the location of the vehicle. This system enables the user to observe and track his vehicle's location using a geographic coordinate system (GPS).
- The system used Arduino Mini a microcontroller board built with Atmega328 with a clock speed of 16MHz and with a flash memory of 32kb, a GSM module to send and receive SMS using GSM mobile telephone technology, and a GPS module to receive the coordinates from the satellite for each second.

MINIPROJECT SYNOPSIS

- When a request by a user is sent to the number at the modem, the system automatically sends a return reply to that particular mobile indicating the position of the vehicle in terms of latitude and longitude. A Program has been developed which is used to locate the exact position of the vehicle
- The vehicle monitoring system monitors and collects data and then the information is communicated with the user via SMS. The SMS contains specified information related to the respective location of the vehicle and a link to the Google Maps app to display the location in the Google Maps which is preinstalled in the user's mobile.
- **Need of Work / Reason for selection of this project:**
 - The vehicle tracking system's main aim is to give Security to all vehicles. The main aim is to monitor the location of the vehicle and reduce vehicle theft by detecting unauthorized movements of the vehicle and then alerting the owner. This is an improved security system for vehicles. This system enables the owner to observe and track his vehicle and find out vehicle movement and its past activities.
- **Objective:**
 - As per Indian Express, yearly more than 30,000 vehicles have been stolen in that more than 20% of vehicles are 4-wheelers in taxis, it helps in dispatch and route management, theft recovery, real-time updates, and many more.
 - The proposed system is used for positioning and navigating the vehicle with an accuracy of 10 m. The Exact location is indicated in the form of latitude and longitude along with the exact Navigated track on Google map.
- **Problem Statement:**
 - The purpose of this device is to monitor the location of a particular vehicle and send it to the user's mobile in form of SMS. The arrived data, in the form of latitude and longitude, are used to locate the Vehicle on Google maps.
 - The user can get the current stats of the vehicle whether the vehicle is turned on or off in real-time and control the vehicle's engine on and off through the mobile SMS which helps in reducing theft cases and easy tracking/monitoring of taxis or vehicles.

MINIPROJECT SYNOPSIS

- **Block Diagram with explanation:**

- **Benefits to the surroundings/society:**

- It helps the user to track the accurate location of the vehicle and makes it easy to communicate with the vehicle wirelessly with the help of SMS and also helps in-vehicle monitoring and reduction of theft cases with the less lost production and maintenance cost.

4. Methodology:

- **Proposed techniques or methods to be implemented:**

- The project consists of a GPS receiver and GSM modem with a microcontroller. The whole system is attached to the vehicle. On the other end, one GSM mobile phone is used so the GPS system will send the longitude and latitude values corresponding to the position of the vehicle to the GSM Modem.

MINIPROJECT SYNOPSIS

- **Advantages:**

- Track the vehicle location with a single click.
- Anti-theft management.
- Turn off the engine if any unauthorized moments take place.
- Low designing time.
- Easy Communication with the vehicle.
- Economical and less power-consuming.
- Change the status of the engine (off to on / on to off) using a mobile phone.

- **Limitations:**

- Poor signal & battery life concerns.
- Location inaccuracy & drifting.
- Accuracy may drop due to environmental conditions like bad weather, and heavy snowfall.
- Cannot auto-update the live location it requires sending an SMS request to get the current live location.

- **Applications:**

- Can be used in taxis to track the current location of the vehicle by the user.
- It can be used to lock/turn off the vehicle's engine in case of any theft or unauthorized access.
- It can be used for Driver Monitoring and Rout Monitoring.
- Also used to track the activity of a company's mobile assets (Fleet Monitoring).

5. Project Equipment / Components:

- **Hardware Requirements:**

- Arduino Nano (Microcontroller Atmega328)
- GPS Module
- GSM Module
- Power Supply
- Zero PCB
- Connecting Wires
- Resistors / Capacitors / Transistors
- Push button

- **Software Requirements:**

- Arduino Compiler.
- C Language.

PW 761 EC	Project Work - I					Core	
Prerequisite	Contact Hours per Week				CIE	SEE	Credits
	L	T	D	P			
-	-	-	-	4	50	-	2
Course Objectives <ul style="list-style-type: none"> ➤ To enhance practical and professional skills. ➤ To familiarize tools and techniques of systematic literature survey and documentation ➤ To expose the students to industry practices and teamwork. ➤ To encourage students to work with innovative and entrepreneurial ideas Course Outcomes <ol style="list-style-type: none"> 1. Demonstrate the ability to synthesize and apply the knowledge and skills acquired in the academic program to the real-world problems. 2. Evaluate different solutions based on economic and technical feasibility 3. Effectively plan a project and confidently perform all aspects of project management 4. Demonstrate effective written and oral communication skills 							

The department can initiate the project allotment procedure at the end of VI semester and finalize it in the first two weeks of VII semester.

The department will appoint a project coordinator who will coordinate the following:

- Collection of project topics/ descriptions from faculty members (Problems can also be invited from the industries)
- Grouping of students (max 3 in a group)
- Allotment of project guides

The aim of project work is to develop solutions to realistic problems applying the knowledge and skills obtained in different courses, new technologies and current industry practices. This requires students to understand current problems in their domain and methodologies to solve these problems. To get awareness on current problems and solution techniques, the first 4 weeks of VII semester will be spent on special lectures by faculty members, research scholars, post graduate students of the department and invited lectures by engineers from industries and R&D institutions. After completion of these seminars each group has to formalize the project proposal based on their own ideas or as suggested by the project guide.

Seminar schedule will be prepared by the coordinator for all the students from the 5th week to the last week of the semester which should be strictly adhered to.

Each group will be required to:

1. Submit a one-page synopsis before the seminar for display on noticeboard.
2. Give a 30 minutes' presentation followed by 10 minutes' discussion.
3. Submit a technical write-up on the talk.

At least two teachers will be associated with the Project Seminar to evaluate students for the award of sessional marks which will be on the basis of performance in all the 3 items stated above.

The seminar presentation should include the following components of the project:

- Problem definition and specification
- Literature survey
- Broad knowledge of available techniques to solve a particular problem
- Planning of the work, preparation of bar (activity) charts
- Presentation- oral and written

Demonstrate effective written and oral communication skills 							

The aim of Project work –II is to implement and evaluate the proposal made as part of Project Work - I. Students can also be encouraged to do full time internship as part of project work-II based on the common guidelines for all the departments. The students placed in internships need to write the new proposal in consultation with industry coordinator and project guide within two weeks from the commencement of instruction.

The department will appoint a project coordinator who will coordinate the following:

1. Re-grouping of students - deletion of internship candidates from groups made as part of project Work-I
2. Re-Allotment of internship students to project guides
3. Project monitoring at regular intervals

All re-grouping/re-allotment has to be completed by the 1st week of VIII semester so that students get sufficient time for completion of the project.

All projects (internship and departmental) will be monitored at least twice in a semester through student presentation for the award of sessional marks. Sessional marks are awarded by a monitoring committee comprising of faculty members as well as by the supervisor. The first review of projects for 25 marks can be conducted after completion of five weeks. The second review for another 25 marks can be conducted after 12 weeks of instruction.

Common norms will be established for the final documentation of the project report by the respective departments. The students are required to submit draft copies of their project report within one week after completion of instruction.

Note: Three periods of contact load will be assigned to each project guide.
