Sub: Regarding the BIM Training for VI semester Civil Engg. Students

Respected sir,

For VI semester civil engineering, our students want an option of learning BIM (Building Information Modelling) software. BIM is a trending software in the civil engineering domain which is providing a huge platform of opportunities starting from freshers. One company VDEI (Virtual Design Engineering Institute) approached us to give one month in-campus training of BIM software along with REVIT Architecture, with a nominal fee compared to the other training providers. VDEI is a leading BIM consultant company, having their consultancy works in various countries like Middle East, USA etc. VDEI even promised the department, for their extended help in placement of at least 15 students after their BIM training. In this regard, for the benefit of students, I request you to permit us to conduct this training in our college campus from May 8 to June 4 2023 at Engineering Graphics & Computer Applications lab at C-Block.

Thanking You,

Yours Sincerely,

Bandita Naik

Sub: Regarding the Total Station Training for III semester Civil Engg. Students

Respected sir,

For III semester civil engineering students we would like to offer a hands-on experience training program on Total station equipment in Surveying. Total Station is one of the leading equipment in the civil engineering domain which can help the students in the field. Based on our MoU with the HIEE Empowering Engineers Pvt Ltd., their team is ready to take on this training program for 4 days as a workshop in our campus. In this regard, for the benefit of students, I request you to permit us to conduct this training in our college campus from June 12th to 15th 2023, from 9.30am to 05:00pm.

Thanking You,

ABOUT EEE DEPARTMENT:

The Department of Electrical and Electronics Engineering was started in the year 2008 with an intake of 60, with an objective of imparting quality education in the Electrical and Electronics Engineering. EEE is the oldest of the engineering streams, and its applications are many. The number of career prospects for this group is huge, and it is the reason for many people to join this course. These students are offered with high salaried jobs, especially in the public sector. They are needed in power industry, electrical machine industries, etc. A number of private companies also offer lucrative job roles for these engineers.

Due to this requirement, Methodist gives a special preference to EEE, and we had built a special lane for this group. The laboratories, faculty, etc. for this group are of top notch, and we chalk out various industrial tours, seminars workshops, etc. for the benefit of our students. EEE is one of the core streams of engineering, and it is required in any case. Hence the demand for this group never decreases, and it is the steadiest stream ever.

About the workshop:

As we know "The Internet of Things (IoT) is a system of interrelated computing devices, mechanical and digital machines, objects, animals or people that are provided with unique identifiers and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction.

This Workshop is aimed to explore the potential areas and the significance in the fields of Internet of Things(IOT).

Venue:

C-210, C - Block

Department of EEE,

Methodist College of Engineering and Technology.

Resource Person:

Mr. Swamy is employed with Pantech e Learning as a subject expert. His working areas include IoT applications; He has trained over more than 1000+ students and faculties across various universities and colleges in AP & TS.

The main topics covered in the workshop are given below:

- Different types of Arduino board such as Arduino Uno, Arduino Uno R3 SMD, • Ardino Pro 3.348 MHz , Arduino mini , Aurdino Ethernet and there characteristics (Power supply, clock speed, Digital I/O, Analog Input, PWM modulation and different kinds of interfacing.
- Wi-Fi module Programming with Arduino.
- Interfacing of sensors and uploading data on cloud.
- For Interfacing different types of sensors with Arduino and Arduino with database, different programming steps have been discussed (function , statement ,control statement levels variables, math, pin mode, serial mode, digital mode variable, delay and for loop)
- Interfacing and controlling various devices like LED, motors, sensors etc with Arduino.
- ✓ Total 70 students participated in the workshop.

Outcomes of attending the workshop:

- What "the Internet of Things" means and how it relates to Cloud computing concepts
- How open platforms allow you to store your sensor data in the Cloud
- The basic usage of the Arduino environment for creating your own embedded projects at low cost
- How to connect your Arduino with your Android phone.
- How to send data to the Internet and talk to the Cloud.

At valedictory ceremony, the participants were awarded the certificates and provided with the kit to continue their journey with IoT. Also competitive hands-on problem has been given to the students and students actively participated.

The student has successfully achieved student level credential for completing CCNAV7: Introduction to Networks course administered by the undersigned instructor. The student was able to proficiently:

- Configure switches and end devices to provide access to local and remote network resources.
- Explain how physical and data link layer protocols support the operation of Ethernet in a switched network.
- Configure routers to enable end-to-end connectivity between remote devices.
- Create IPv4 and IPv6 addressing schemes and verify network connectivity between devices.
- Explain how the upper layers of the OSI model support network applications.
- Configure a small network with security best practices.
- Troubleshoot connectivity in a small network.

Dear Dr Ravi M Yadahalli,

Greetings...!!

Maven Silicon for the community provides a Certified Course of 1 Month Duration to bridge the Gap between Industry & Academia..!

Learn a VLSI Online Course for Free. Learn at your own pace.

Grab the Online VLSI SoC Design using Verilog HDL Course Starts on 28th Sep 2022.

[Click here to Register Now..!](#)

VLSI SoC Design using Verilog HDL Course :

This VLSI SoC Design Course using Verilog HDL is specially designed for Pre-final and final year Electronics / Electrical Engineering students to learn and strengthen the knowledge on chip design process. This course explains VLSI Technology, SoC Architecture and Design process, coding for synthesis and simulation. It explains the concept of hardware description language and basic concepts like data types and operators. Then it explains advanced concepts like assignments, procedural blocks, synthesis coding style and testbench coding.

Why this course?

1. Foundation to VLSI Career
2. Certificate on Completion
3. Course delivered by Industry Experts
4. Hands-on Experience through Labs
5. Live Q&A Sessions

About the Instructor :

The entire course is designed and delivered by CEO Mr. P R Sivakumar, a seasoned engineering professional with 20+ years of experience in Industry and Academia. He has worked as a Verification Consultant for the top EDA companies Synopsys, Cadence and Mentor and helped

various ASIC and FPGA design houses deploy and use various verification methodologies effectively, resulting in successful tape out of SoCs and Chips.

He now specializes in offering Verification IPs and consulting services, EDA flow development and corporate training on advanced ASIC verification methodologies and technologies. He is the recipient of the "Outstanding Technical Achievement" award from Cadence Design Systems and has delivered various corporate training courses at IBM, NXP, Cypress, Broadcom, Qualcomm, ST Micro, AMD, AvagoTech, Wipro, Samsung, etc.

Mode of Teaching : Online(On LMS & Live Q&A on Microsoft Teams)

Duration : 1 month

Course Price : Free

Batch Start Date : 28th Sep 2022

Eligibility : BTech/MTech in 2nd(only if they are interested), 3rd and Final year of Electronics and Electrical Department.

Certification Course : Yes (Globally Recognised Program)

For more details on **FREE** hands-on course, Click here. Let me know if you would be interested to take this forward.

We would be very glad to have all of the students from the Electronics and Electrical Department participate in this FREE Course and explore their interest in the VLSI Domain. **Minimum number expected is 30.**

Also, Kindly share the link with the students for registration so that we can receive the list 3 days prior to batch start: https://docs.google.com/forms/d/e/1FAIpQLSda7V1-1qrweVUN4CEJ-007FbExt_smFikQFeU-v6i-vK8EQ/viewform

Dear Dr Ravi M Yadahalli,

Hope this email finds you well!!

Once again we would like to thank you for providing the opportunity to your students to take up the Free VLSI SoC Design using Verilog HDL course for a duration of 30 days i.e. from 28th Sep 2022 to 28th Oct 2022.

We are sure that this course was knowledgeable, and we are glad to see that many students have actively participated and were able to complete the course.

However we would like to hear from the students about their course experience and also we would like to know if any of the students are interested in making a career in VLSI. We would be happy to guide them to have a successful career.

Looking forward to hearing from you. Attached is the Course Completion Report for your reference.

For any queries call me on +91- 9886914555.

Dear Sir,

Sub: Request for a five day workshop on PCB DESIGN -Reg.

I, Dr.B.Krishna Kumar, Prof & Head, department of Electronics and Communication Engineering, hereby requesting you to organise a five day workshop on "PCB DESIGN" for our final year students of ECE.

I personally feel that your valuable inputs on the above subject would definitely help our students in getting good jobs in core companies.

Looking forward to hearing from you.
