Central Library and Information Centre

4.2.4 Average number of teachers and students using library per day over last one year
Methodist College of Engineering and Technology Library provides in house, photocopy, Printout, CAS, SDI and internet facilities in addition to lending facilities on day to day basis. Remote access to the e-resources of the library is also available within the college to its users through access points. The college library provides access to e-Journals, E- books and etc. Almost all the members of library (undergraduate students, post-graduate students, teaching faculty, research scholars and outside guest users) are logging into the library every day for their reference. Being a multi-user platform, one log-in is used by multiple users; hence per day number of users accessing these e- resources cannot be computed.

To access the e-journals the user sends an abstract of the respective e-journal and the librarian downloads the entire text for the users and sends them via e-mail. However the access to e-resources cannot be calculated. The method used for computing the data is statistics of students and staff coming to the library, circulation data, use of reference books in library and photocopy services, etc..

Due to Pandemic period   percentage of Students & faculty are less.
