

- **Mind Map Lectures:**

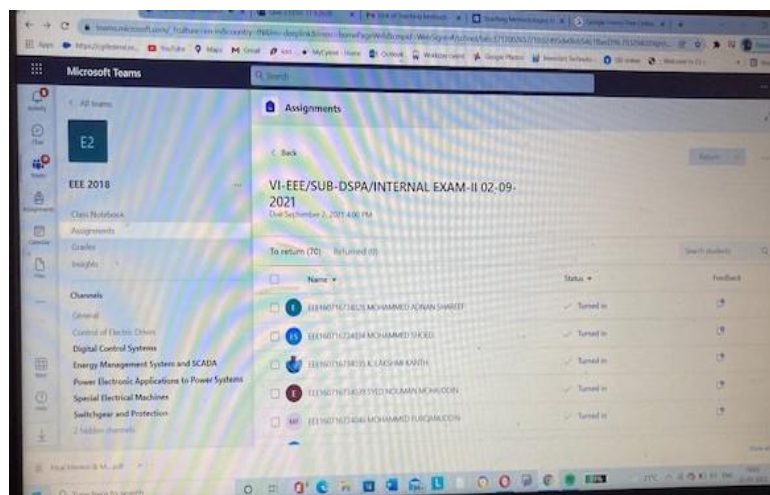

Mind map technique is an effective method to take notes and brainstorm topics. A mind map involves writing down a central theme and thinking of new and related ideas which radiate out from the centre. By focusing on key ideas written down in your own words and looking for connections between them, you can map knowledge in a way that will help you to better understand and retain information.

Lectures using Mind Maps were delivered to students to help them note down only the most important information using key words, and then make connections between facts and ideas visually.

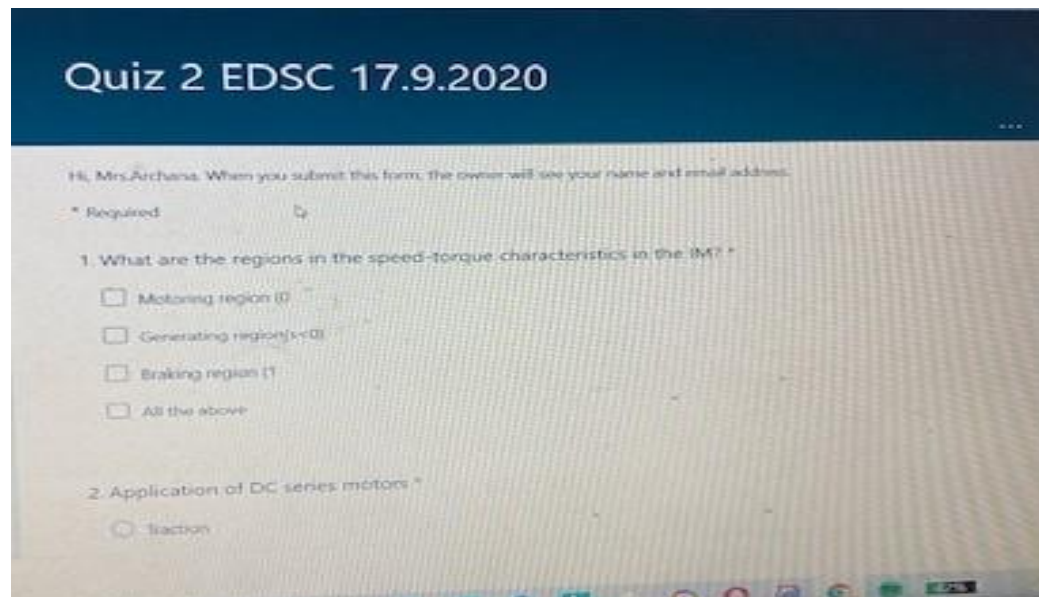

- **Online Assignments:**

All the faculty members have distributed and evaluated assignments using the Assignment tab available in this classroom in a transparent manner.

- **Online Quizzes:**

All the course instructors have created Quizzes using MS Forms and the links were shared to students and evaluation was automatically done.

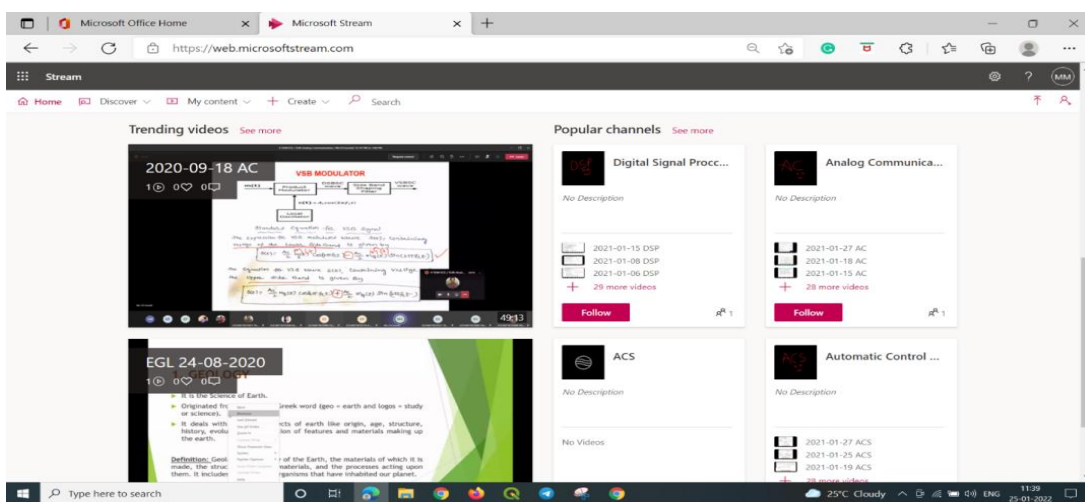

- **Virtual Labs:**

The Virtual Laboratory is an interactive environment for creating and conducting simulated experiments: a playground for experimentation. It consists of domain-dependent simulation programs, experimental units called objects that encompass data files, tools that operate on these objects.

Some courses have conducted their practical lab sessions in virtual mode to enhance the learning levels of the students.

- **MS Streams:**

Additionally, with Microsoft Teams, Teachers recorded the classes which were available for the future reference especially, for students who were absent for that specific class. Apart from that, teachers have also shared notes and power point presentations prepared for that course in their respective channels in MS Teams App.

- **Teaching through YouTube videos:**

YouTube videos can be a great way to **learn complex procedures, improve knowledge gain and understand difficult topics**. Some of the faculty members have started their own channels and get YouTube subscribers so more learners can easily watch educational video lessons from the comfort of their mobile devices.
