SUMMARY

- The number of Value-added programs organized over the past 5 years under 5- Engineering programs & DBM are summarised in above table
- These are Courses offered for more than 30 hrs duration either outside curriculum and hence can add value to students, thus help ful for their placements
- These Courses include Oracle, Human values, career development etc.
- The student development programmes on communication skills and placement trainings are held as common programmes across all branches of Engineering
- The attachments include: Event-wise 1) Schedule & Syllabus, 2) Sample Participation Certificate, 3) Participants list

CCNA Routing & Switching: Introduction to Networks

Course Syllabus:

Module - 1

- Introduction About the Training
- Introduction About the NetAcad.com
- Chapter 1: Exploring the Network
- Chapter 2: Configuring a Network Operating System
- Chapter 3: Network Protocols and Communications
- Online Test Chapter 1, 2 & 3
- Chapter 4: Network Access
- Chapter 5: Ethernet
- Online Test Chapter 4 & 5
- Chapter 6: Network Layer
- Chapter 7: Transport Layer
- Chapter 8: IP Addressing
- Online Test Chapter 6, 7 & 8
- Chapter 9: Subnetting IP Networks
- Chapter 10: Application Layer
- Chapter 11: It's a Network
- Online Test Chapter 9, 10 & 11
- Lab Activity
- Teach Back session
- Practical Test
- Online Feedback
- Online Final Exam (Module - 1)

Certificate of Course Completion

CCNA Routing and Switching: Introduction to Networks

The student has successfully achieved student level credential for completing CCNA Routing and Switching: Introduction to Networks course administered by the undersigned instructor. The student was able to proficiently:

- Explain network technologies.
- Explain how devices access local and remote network resources.
- Describe router hardware.
- Explain how switching operates in a small to medium-sized business network.
- Design an IP addressing scheme to provide network connectivity for a small to medium- sized business network.
- Configure initial settings on a network device.
- Implement basic network connectivity between devices.
- Configure monitoring tools available for small to medium-sized business networks.

Java

- Is the most popular, class-based, object-oriented, high-level programming language.
- Developed by James Gosling at Sun Microsystems, released in 1995 as a core component of Sun Microsystems, Java Platform.
- Drives much of its syntax from C and C++.
- Is typically compiled to bytecode (class file) it can be run on any Java Virtual Machine (JVM) regardless of architecture.
- Is specifically designed to have few implementation dependencies.

Intended to let application developers write a code that runs on one platform & does not need to be recompiled to run on another

Java has characteristics of Object Oriented languages

- Inheritance: Creating new classes & extending them to reuse the existing code & adding new features as needed.
- Encapsulation: combining the information and hiding the abstraction.

• **Polymorphism:** Providing different functionalities by the functions having the same name, based on the signatures of the methods.

• **Dynamic binding:** Providing maximum functionality to a program about the specific type at runtime.

Features

Platform independence: Key feature of Java language is write-once-run-anywhere concept. With Java, you can run the code written on any system on any other system.

Simplicity: Programs are easy to write and debug. Java provides a bug-free system due to strong memory management.

Portability: Java feature write-once-run-anywhere makes it portable, provided that the system has an interpreter for JVM.

Also, Java has standard data size irrespective of the OS or the processor.

Performance: Uses native code and light weight process called threads.

The advanced version of JVM uses adaptive and just-in-time compilation technique to improve their total performance.

Distributed: Widely used protocols like HTTP and FTP are developed in Java.

Internet programmers can call functions on these protocols and can access the files from any remote machine on the internet, rather than writing codes on their local system.

Secure:

• Programs in Java run under an area known as the sand box.

• Security manager determines the accessibility options of a class like reading and writing a file to the local disk.

• Uses public key encryption system to allow the Java applications to transmit over the internet, in a secure and encrypted form.

• The bytecode verifier checks the classes after loading.

Robust:

- Java has strong memory allocation.
- Automatic garbage collection mechanism.
- Powerful exception handling.
- Type-checking mechanism.
- A compiler that checks the program for any errors and interpreter checks any run-time errors and makes the system secure from crash.

What makes Linux endearing to users? Linux consists of the kernel, libraries, and various applications. Each distribution of Linux is a different combination of these elements. And Ubuntu has found the favour of several users making it the most popular.

What is Ubuntu Linux?

Ubuntu is an ancient African word meaning 'humanity to others'. It also means 'I am what I am because of who we all are'. The Ubuntu Linux operating system brings the spirit of Ubuntu to the world of computers.

Ubuntu is one of the latest and most widely downloaded distributions of Linux. It is the most popular flavor of Linux.

So, what are the benefits of Linux and Ubuntu?

1. **Freeware software:** One of the greatest advantages of Linux OS is that it is free of cost; it does not include any paid subscriptions, paid premium editions, or extra paid software. There is very little maintenance cost and it is easy to run and maintain. Further, if you just want to check out the Linux OS, you have the option to boot from a CD, without installation, and try out the Linux experience.
2. **Manageability:** Linux is easy to manage, starting right from its installation, startup, shutdown, initialization, and package management. It is simple to deploy and you can complete a typical installation of the standard services within 15 minutes. Also, it does not include any additional extraneous applications, making it fast and efficient.
3. **Easy to upgrade and update:** The Linux OS

is easy to install and upgrade to obtain the latest features. Also, the process of obtaining updates is eased through the Debian and APT packaging, which makes the introduction of new software easy and smooth.

4. **Security:** Linux is hard-to-hack. To add to that, the frequent updates ensure that any further security risks are also eliminated.
5. **Vast source of online help:** There are little chances of getting stuck while installing or working with Linux. This is because of a large source of online help available for any issue related to Linux.
6. **User-friendly:** Ubuntu is user-friendly and easily available. It can also be easily installed. Ubuntu is one OS, currently being considered as the best bet for those struggling and considering moving away from Windows OS. Ubuntu is a clear indication that users are beginning to accept Linux as a better OS. Whether it is for personal use, for your organization or for propagating computer education among your community, Linux is the ideal choice. Its secure environment, user-friendliness and above all its ease of installation, makes it the most favoured OS among most users.
7. **Add-ons:** Linux is free and requires no costly add-ons. Download Linux from the Internet and install it on as many machines as you want. The same is true of most Linux application software.

So, why Linux?

Support

Ubuntu & Linux are the best supported operating systems of all time. You can get help from tens of

thousands of active Linux users and programmers from all over the world, at any time.

Multi-platform

Windows is limited to Intel and Intel-compatible processors and only certain machine architectures. Linux and other Unix-compatible operating systems work on a wide variety of processors and machine architectures.

Open Protocols

Linux uses open protocols. There are no proprietary protocols that lock you. Monopolies do not exist in the Linux world.

With Linux, you can

- Browse the internet with Mozilla Firefox browser – easier, safer and faster, less susceptible to virus infections.
- Do office activities with LibreOffice Suite—a complete suite for document creation, spreadsheet, presentation, design and database. It supports all formats including MS-Word, MS-Excel, MS-Powerpoint.
- Program using Java, Python, C/C++, Shell-script, PHP & MySQL and many more.
- Create graphic designs using GIMP, Inkscape – for photo retouching, image composition and image authoring (equivalent to Photoshop).
- Use multimedia players like VLC, Movie Player for music and videos.

Do all of these & more without purchasing expensive commercial software. Use the Ubuntu Software Centre facility to download any software.

AGREEMENT

With reference to MoU signed between Imperial Society of Innovative Engineers (ISIE) Noida and Methodist College of Engineering & Technology, Hyderabad on dated 20-09-2018, is hereby agreed to start Academic Partnership Program (APP) on Electric Vehicle Engineering based on the following conditions

1. Imperial Society of Innovative Engineers (ISIE) will abide by the following
 - i. Procure Certified trainer and industry expertise
 - ii. Procure Material/components for manufacturing/assembly of vehicle
 - iii. Electric Vehicle Engineering program comprising of Theory, Video Lectures, Software, Hands on Season, Special Sessions of Manufacturing, Guest Lectures will be completed in a stipulated time period mention in clause iv below
 - iv. Electric Vehicle Engineering program will be completed in three modules i.e.
 - 1st module between 05-02-2019 to 30-03-2019,
 - 2nd module between 01-07-2019 to 31-08-2019 and

3rd and final module between 03-09-2019 to 31-10-2019

- v. Should complete all the internships, projects guest lecture etc. as mentioned in the program
- vi. Should help in arranging placements to the trained students.

2. Methodist College of Engineering & Technology will abide by the following

- i. Provide the needful infrastructure of class area, man power and electrical connections for the class room equipped with all essential amenities, LCD projector and necessary man power to assist in building the vehicle..
- ii. Provide necessary infrastructure for computer Lab with 60 Systems with LCD projector.
- iii. Provide 60 students
- iv. Fee of the program is Rs. 10,000/- for each student
- v. Payment will be done in four phases i.e.
In 1st phase 10% of amount at the time of this agreement
In 2nd phase 30% of the amount at the completion of module one
In 3rd phase 30% of the amount at the completion of module two
In 4th and final phase 30% of the amount at the completion of module three

Course Title : Electric Vehicle Engineering		Course Planner : ISIE Technical Committee		Guest Lecture 3				
2. Hands on training 3. Live Project based Learning 4. Placement oriented 5.								
Lecture type	Broad Topic	Pedagogical Tool: Demonstration/ Case Study / images / animation / ppt etc. Planned	Date Tentative(Mon- th/Day/Year)	Timing(p.m)	Day	Month		
Theory and video	Introduction to electric vehicle and how its is better than combustion engine	Images & ppt.	2/5/2019	4:15-5:15	Tuesday	February		
Software Lab	Introduction to designing and softwares	Software operation and discussion	2/6/2019	4:15-6:15	Wednesday	February		
Software Lab	2D- sketching in solidworks	Software operation and discussion	2/7/2019	4:15-6:15	Thursday	February		
Theory and video	Various Systems of an electric vehicle and their significance	Ppt, videos and discussion	2/8/2019	4:15-5:15	Friday	February		
Theory and video	Chassis design of electric vehicle and force calculation.	Ppt, videos and discussion	2/11/2019	4:15-5:15	Monday	February		
Software Lab	2D- blue print presentation	Software operation and discussion	2/12/2019	4:15-6:15	Tuesday	February		
Software Lab	3D-modeling in solidworks	Software operation and discussion	2/18/2019	4:15-6:15	Monday	February		
Theory and video	Topologies for electric drive-train and Electrical propulsion, Types and their significance.	ppt & images	2/19/2019	4:15-5:15	Tuesday	February		
Software Lab	3D-modeling in different components	Software operation and discussion	2/20/2019	4:15-5:15	Wednesday	February		
Software Lab	3D-modeling of different parts.	Hands on training on Software part	2/21/2019	4:15-6:15	Thursday	February		
Theory and video	Configuration of AC and DC motors in modern electric vehicles and selection of motor and calculation(electrical and mechanical)	ppt & Video demonstration	2/22/2019	4:15-6:15	Friday	February		
Theory and video	Introduction to vehicle Dynamics, Steering system and its calculations	Ppt & Video demonstration	2/25/2019	4:15-5:15	Monday	February		
Software Lab	Assembly of different parts in solidworks.	Hands on training on Software part	2/26/2019	4:15-6:15	Tuesday	February		
Software Lab	Assembly of different parts in solidworks.	Hands on training on Software part	2/27/2019	4:15-6:15	Wednesday	February		
Theory and video	Suspension system and calculations	Ppt, images & Video Demonstration	2/28/2019	4:15-5:15	Thursday	February		
Software Lab	Final product rendering and finalising.	Hands on training on Software part	3/5/2019	4:15-6:16	Tuesday	February		

Lecture type	Broad Topic	Pedagogical Tool Demonstration/ Case Study/ Images / animation / ppt etc. Planned	Date Tentative (Month/ Day/Year)	Timing (p.m)	Day	Month
Hands-on session	Over view of various systems of an electric vehicle	Hands-on session	3/6/2019	4:15-5:15	Wednesday	February
Theory and video	Braking and its significance, calculations	Ppt, images & Video Demonstration	3/7/2019	4:15-6:15	Thursday	February
Theory and video	Energy storage in battery, fuel cell and super capacitor, flywheel based energy storage and calculation of various energy storage.	Ppt & Images and video demonstration	3/8/2019	4:15-5:15	Friday	March
Software Lab	Final product rendering and finalising.	Hands on training on Software part	3/11/2019	4:15-6:15	Monday	March
Hands-on session	Hands on fabrication practice (cutting, grinding, drilling, jigs and fixtures)	Hands-on session	3/12/2019	4:15-6:15	Tuesday	March
Theory and video	Sizing the power electronics based on Switch Technology, Switching Frequency and Ripple capacitor design.	Ppt & Images and video demonstration	3/13/2019	4:15-6:15	Wednesday	March
Software Lab	Introduction to Lotus	Hands on training on Software part	3/14/2019	4:15-6:15	Thursday	March
Hands-on session	Hands on welding (Electric-Arc and MIG)	Hands-on session	3/15/2019	4:15-6:15	Friday	March
Theory and video	Energy management strategies and its general architecture, Rule optimised based EMS	Pdf, images and video demonstration	3/16/2018	4:15-6:15	Monday	March
Theory and video	EMS characteristics and significance	Pdf, images and video demonstration	3/19/2019	4:15-6:15	Tuesday	March
Software Lab	Simulation of Suspension System	Hands on training on Software part	3/20/2019	4:15-6:15	Wednesday	March
Hands-on session	Telemetry system	Hands-on session	3/14/2019	4:15-6:15	Thursday	March
Software Lab	Simulation of Suspension System	Hands on training on Software part	3/15/2019	4:15-6:15	Friday	March
Hands-on session	Advanced telemetry system	Hands-on session	3/18/2019	4:15-6:15	Monday	March
Hands-on session	Fabrication of tubular frame using cutting, grinding, and welding.	Hands-on session	3/19/2019	4:15-6:15	Tuesday	March
Software Lab	Simulation in Ansys.	Hands on training on Software part	3/20/2019	4:15-6:15	Wednesday	March

Dear Sir

We are very happy Electric Vehicle Design Classes is going very good.

But before that Some the parameters need to checked prior Release of **2nd Phase of M.O.U amount.**

1. Chassis Material Must be dispatched With Lab report stating the grade of the Steel.
2. During manufacturing, we need 2-3 Trainers to teach welding Technology to Students So students can involve more.
3. Tyre Must be dispatched to make the student understand Steering and Suspension Mounting Points and Track Width.
4. As per Conversion during M.O.U Signing with Mr.Ashar Ahmed Marketing Head of ISIE it was told ISIE has tied-up with Dassault System. So Dassault is providing Keys to all the students but till now we have not received any Softwares keys.
5. We are Expecting Ansys and Solidworks keys from your side(ISIE). So Kindly install all original Softwares in all the Systems .As per M.O.U we are providing only systems from our side. College staff will not participate during any installation process . Matlab And Lotus Shark Installation process is pending .
6. We have not got any Guest Lecture, nor any internship-related act, which was highlighted by your marketing team.
7. We are Expecting Students should be involved in Manufacturing, Assembling of Components rather than bringing Readymade Components So that students gain More Knowledge
8. The Golf Cart which will be given by ISIE, according to our estimation is 2.2 lakh nearly, rest 3.8 lakh is being given to ISIE for skill development.So Kindly send 2 industrial trainers for teaching,or we need to split batches as 60 student at one time are finding it difficult to understand. The trainer should teach the student in such a way that the outcome should be that the students can participate in any events like Baja, Supra, ESVC Etc.

SUMMARY

- The number of Value-added programs organized over the past 5 years under 5- Engineering programs & DBM are summarised in above table
- These are Courses offered for more than 30 hrs duration either outside curriculum and hence can add value to students, thus help ful for their placements
- These Courses include Oracle, Human values, career development etc.
- The student development programmes on communication skills and placement trainings are held as common programmes across all branches of Engineering
- The attachments include: Event-wise 1) Schedule & Syllabus, 2) Sample Participation Certificate, 3) Participants list

Hope you are doing great. As per our discussion below are the details for Phase 2 training.

12th October - We will have a session on Interview Skills, Resume Writing & Group Discussion. This will be handled by Mr. Thejha. This will be a full day session.

14th & 15th October - We will divide students into 2 batches

14th October -

- Batch 1 - Will have Mock Interviews & Mock GD for all students
- Batch 2 - Will have training on Quant/Reasoning

15th October -

- Batch 2 - Will have Mock Interviews & Mock GD for all students
- Batch 1 - Will have training on Quant/Reasoning

16th & 17th October - Students will have sessions on the modules which are not covered. 2 trainers will be on the campus to train students on the areas which are not covered.

Let us know if the dates are fine and if you need any clarifications. Only 12th would be an additional day which we are requesting so that students performance in Mock Interviews would be effective.

Thanks much,
R.Thejha

IIT Bombay

Subject: Submission of Planning of Spoken-Tutorial Software Training program to the Methodist College of Engineering and Technology for the academic year 2016-2017.

Methodist College of Engineering and Technology, Hyderabad happily announces the collaboration with Spoken Tutorial Project of IIT Bombay as Spoken Tutorial Resource Centre, an initiative of National Mission on Education through ICT, MHRD, Govt. of India.

The Spoken Tutorial project is the initiative of the 'Talk to a Teacher' activity of the National Mission on Education through Information and Communication Technology (ICT), launched by the Ministry of Human Resources and Development, Government of India.

Methodist College of Engineering and Technology, Hyderabad, Spoken Tutorial Resource Center will be conducting Trainings on Linux, LaTeX, Scilab, PHP&MySQL, Python, Java, C/C++, Netbeans, open office, OScad, K-Turtle.

Our Future Plans as a FOSS Resource Centre:

First of all, a workshop on spoken-tutorial program and FOSS will be conducted for all the college admin staff. Workshop on spoken-tutorial program was already conducted for the teaching staff of all departments. We are planning to conduct FOSS awareness programs in the nearby colleges. We are aware that, as a FOSS resource centre, it becomes our duty to popularize the FOSS and spoken-tutorial program in the educational-institutes in and around our college. These awareness programs will be implemented in the coming months. Promotion of FOSS through our college website will be done as well.

We are happy to bring to your notice that for the students of our college under Spoken Tutorial Project many courses are offered. Following is the schedule of the courses offered by different departments.

Spoken Tutorial Software Series

No.	Software	Application
1	Basic IT Skills package	<p>Learn how to use</p> <ul style="list-style-type: none"> The Linux operating system LibreOffice Suite - for basic Office applications and Firefox web browser - to browse the internet safely <p>This package is useful to all who wish to learn basic IT skills. Absolute must for beginners.</p>
2	Ascend	<p>ASCEND is a free, open source, mathematical modelling system.</p> <p>Its main uses have been in the field of chemical process modelling, with its novel modelling language conventions and powerful solver. Useful for Chemical Engg and Chemistry students.</p>
3	BASH	<p>Bash is a "Unix shell" command-line interface for interacting with the operating system. Bash has the ability to run an entire script of commands, known as a "Bash Shell script" or "Shell script".</p> <p>Familiarity with GNU/Linux command lines, and familiarity with basic programming concepts is a pre-requisite for learning BASH. System administrators will greatly benefit by learning to automate common tasks using BASH.</p>
4	Biopython	<p>Biopython is a collection of Python tools for computational biology and bioinformatics. Biopython contains modules and classes to represent protein sequences, nucleic acid sequences and sequence annotations.</p>
5	Blender	<p>Open source equivalent to Maya and 3DMax. Useful to create 3D Animation for Architecture & Animation students. Can be used by Civil Engineering students, also.</p>
6	C and C++	<p>Powerful features, simple syntax, and portability make C a preferred language among programmers, for business and industrial applications. Widely used in the development of operating systems.</p>
7	Advanced C	<p>For Advanced C series, learner should necessarily go through C and C++ series beforehand.</p>
8	Advanced C++	<p>For Advanced C++ series, learner should necessarily go through C and C++ series beforehand.</p>
9	CellDesigner	<p>CellDesigner is a process diagram editor for drawing gene-regulatory and biochemical networks. CellDesigner is used for user-friendly visualization</p>

19	Java Business Application	Learn how to create a business application from scratch. For Java Business Application series, learner should necessarily go through Java and Netbeans series beforehand.
20	Jmol Application	Learn how to create 3D chemical, crystal and biomolecules structures. This application is useful for school students (9th standard upto Post Graduation level) as well as school teachers. Very useful to teach and learn abstract chemistry concepts.
21	KTurtle	An educational programming environment which helps in learning how to build logic and how to program, in an easy manner. Some of its features are: intuitive syntax highlighting, simple error messages, integrated canvas to make drawings on, integrated help function, slow-motion or step execution, and more. Recommended for all who would like to learn programming logic.
22	LaTeX & XFig	LaTeX is a typesetting software for preparing reports, letters and presentations - specially useful for persons engaged in writing/ publishing documents from science/ arts/ commerce fields. Xfig is a free and open source vector graphics editor. In Xfig , figures may be drawn using objects such as circles, boxes, lines, spline curves, text, etc. ... and used in LaTeX and other documents.
23	LibreOffice Suite	Trains in basic computer usage skills like Word processing, Spreadsheet, Presentation using the LibreOffice components Writer, Calc and Impress . One can also learn other useful components like Draw, Math and Base in this series.
24	Linux & Ubuntu BOSS Linux	Free operating system, almost neutral to virus attacks and no hassles for licensing issues.
25	OpenFOAM	Open source/ free CFD (Computational Fluid Dynamics) software available for solving and analyzing problems and to create a real world fluid flow movie. Open source equivalent to FLUENT. Widely used in Academics and is gaining popularity in Industry as well- Companies including AUDI, Tata Steel, Volkswagen, and Govt. agencies like BARC (Babha Atomic Research Center). Works only on Linux
26	Oscad- now eSIM	Open Source EDA tool for circuit design, simulation, analysis and PCB design. It is an integrated tool built using open source software such as KiCad, Ngspice and Scilab.

IIT Bombay

Subject: Submission of Planning of Spoken-Tutorial Software Training program to the Methodist College of Engineering and Technology for the academic year 2016-2017.

Methodist College of Engineering and Technology, Hyderabad happily announces the collaboration with Spoken Tutorial Project of IIT Bombay as Spoken Tutorial Resource Centre, an initiative of National Mission on Education through ICT, MHRD, Govt. of India.

The Spoken Tutorial project is the initiative of the 'Talk to a Teacher' activity of the National Mission on Education through Information and Communication Technology (ICT), launched by the Ministry of Human Resources and Development, Government of India.

Methodist College of Engineering and Technology, Hyderabad, Spoken Tutorial Resource Center will be conducting Trainings on Linux, LaTeX, Scilab, PHP&MySQL, Python, Java, C/C++, Netbeans, open office, OScad, K-Turtle.

Our Future Plans as a FOSS Resource Centre:

First of all, a workshop on spoken-tutorial program and FOSS will be conducted for all the college admin staff. Workshop on spoken-tutorial program was already conducted for the teaching staff of all departments. We are planning to conduct FOSS awareness programs in the nearby colleges. We are aware that, as a FOSS resource centre, it becomes our duty to popularize the FOSS and spoken-tutorial program in the educational-institutes in and around our college. These awareness programs will be implemented in the coming months. Promotion of FOSS through our college website will be done as well.

We are happy to bring to your notice that for the students of our college under Spoken Tutorial Project many courses are offered. Following is the schedule of the courses offered by different departments.

Software Offered

Currently Spoken Tutorial project offers software training on the below mentioned list of software, applications and programming languages.

Spoken Tutorial Software Series

No.	Software	Application
1	Basic IT Skills package	<p>Learn how to use</p> <ul style="list-style-type: none"> The Linux operating system LibreOffice Suite - for basic Office applications and Firefox web browser - to browse the internet safely <p>This package is useful to all who wish to learn basic IT skills. Absolute must for beginners.</p>
2	Ascend	<p>ASCEND is a free, open source, mathematical modelling system.</p> <p>Its main uses have been in the field of chemical process modelling, with its novel modelling language conventions and powerful solver. Useful for Chemical Engg and Chemistry students.</p>
3	BASH	<p>Bash is a "Unix shell" command-line interface for interacting with the operating system. Bash has the ability to run an entire script of commands, known as a "Bash Shell script" or "Shell script".</p> <p>Familiarity with GNU/Linux command lines, and familiarity with basic programming concepts is a pre-requisite for learning BASH. System administrators will greatly benefit by learning to automate common tasks using BASH.</p>
4	Biopython	<p>Biopython is a collection of Python tools for computational biology and bioinformatics. Biopython contains modules and classes to represent protein sequences, nucleic acid sequences and sequence annotations.</p>
5	Blender	<p>Open source equivalent to Maya and 3DMax. Useful to create 3D Animation for Architecture & Animation students. Can be used by Civil Engineering students, also.</p>
6	C and C++	<p>Powerful features, simple syntax, and portability make C a preferred language among programmers, for business and industrial applications. Widely used in the development of operating systems.</p>
7	Advanced C	<p>For Advanced C series, learner should necessarily go through C and C++ series beforehand.</p>
8	Advanced C++	<p>For Advanced C++ series, learner should necessarily go through C and C++ series beforehand.</p>
9	CellDesigner	<p>CellDesigner is a process diagram editor for drawing gene-regulatory and biochemical networks. CellDesigner is used for user-friendly visualization</p>

19	Java Business Application	Learn how to create a business application from scratch. For Java Business Application series, learner should necessarily go through Java and Netbeans series beforehand.
20	Jmol Application	Learn how to create 3D chemical, crystal and biomolecules structures. This application is useful for school students (9th standard upto Post Graduation level) as well as school teachers. Very useful to teach and learn abstract chemistry concepts.
21	KTurtle	An educational programming environment which helps in learning how to build logic and how to program, in an easy manner. Some of its features are: intuitive syntax highlighting, simple error messages, integrated canvas to make drawings on, integrated help function, slow-motion or step execution, and more. Recommended for all who would like to learn programming logic.
22	LaTeX & XFig	LaTeX is a typesetting software for preparing reports, letters and presentations - specially useful for persons engaged in writing/ publishing documents from science/ arts/ commerce fields. Xfig is a free and open source vector graphics editor. In Xfig , figures may be drawn using objects such as circles, boxes, lines, spline curves, text, etc. ... and used in LaTeX and other documents.
23	LibreOffice Suite	Trains in basic computer usage skills like Word processing, Spreadsheet, Presentation using the LibreOffice components Writer, Calc and Impress . One can also learn other useful components like Draw, Math and Base in this series.
24	Linux & Ubuntu BOSS Linux	Free operating system, almost neutral to virus attacks and no hassles for licensing issues.
25	OpenFOAM	Open source/ free CFD (Computational Fluid Dynamics) software available for solving and analyzing problems and to create a real world fluid flow movie. Open source equivalent to FLUENT. Widely used in Academics and is gaining popularity in Industry as well- Companies including AUDI, Tata Steel, Volkswagen, and Govt. agencies like BARC (Bhabha Atomic Research Center). Works only on Linux
26	Oscad- now eSIM	Open Source EDA tool for circuit design, simulation, analysis and PCB design. It is an integrated tool built using open source software such as KiCad, Ngspice and Scilab.
27	Perl	Practical Extraction and Reporting Language commonly known as PERL is a high level, general purpose and dynamic programming language. PERL has been used in graphics, web and network programming etc and you can find it's footprints in finance and bioinformatics domain, too.

Dear Mr Pavan Kumar ,

Thank you for accepting our proposal for conducting the APTITUDE training for our 2016 batch of students on the following terms :

- 1) The duration of the training will be 4 days from 24th August to 27th August (both days inclusive)
- 2) the college timings will be followed i.e 9 AM to 4 PM with 40 mins break for lunch as decided by you . We would like you to impart thorough training , and hence even if the time is extended by an hour it is acceptable.
- 3) Our students will be divided into 3 batches , with course running in parallel. Hence 3 Trainers are required.
- 4) The course material will be distributed by you to all the students
- 5) The topics to be covered are generally in line with any aptitude training , and the same will be finalized by mutual discussion
- 6) The students should be evaluated before , during and after the training . Hence pl let us have 3 question papers of 30 min duration and 28 questions .
- 7) The lump sum remuneration agreed by you is Rs 50,000/- (Rupees Fifty Thousand only) payable in installments of 25,000/ + 25,000/- the first installment after completion of second day , 2nd installment after completion of 4 th day .
- 8) We reserve the right to take feedback from the students and the same would be conveyed to you for any course correction to be initiated by you.

Java SE 7 Programming

Duration: 5 Days

What you will learn

This Java SE 7 Programming training explores the core Application Programming Interfaces (API) you'll use to design object-oriented applications with Java. Expert Oracle University instructors will teach you how to write database programs with JDBC through interactive instruction and hands-on exercises.

Learn To:

Create Java technology applications with the latest JDK 7 Technology and the NetBeans Integrated Development Environment (IDE).

Enhance object-oriented thinking skills using design patterns and best practices.

Identify good practices in the use of the language to create robust Java applications.

Manipulate files, directories and file systems.

Write database applications using standard SQL queries through JDBC.

Create high-performance, multi-threaded applications.

Create classes that subclass other classes, extend abstract classes and program with interfaces.

Properly use exceptions and the Collections framework.

Develop applications that manipulate files, directories and file systems.

Benefits to You

Taking this course will help you boost the productivity, communication and collaboration of your organization. At the same time, you'll understand how to reduce the cost of application ownership through executing more efficient development and deployment techniques. Finally, having this course under your belt will help you maintain your edge by staying current with the global standard for developing networked applications.

Earn a Well-Respected Java SE 7 Programmer Certification

You can use this course to further develop your skills with the Java language. Enrolling in this course will also prepare you for and increase your chances of passing the Oracle Certified Professional, Java SE 7 Programmer Exam.

Related Training

Required Prerequisites

Understand object-oriented principles

Basic understanding of database concepts and SQL syntax

Have completed the Java SE 7 Fundamentals course, or experience with the Java language - can create, compile and execute programs

Experience with at least one programming language

Java SE7 Fundamentals

Course Objectives

Perform multiple operations on database tables, including creating, reading, updating and deleting using JDBC technology

Process strings using a variety of regular expressions

Create high-performing multi-threaded applications that avoid deadlock

Localize Java applications

Create applications that use the Java Collections framework

Implement error-handling techniques using exception handling

Implement input/output (I/O) functionality to read from and write to data and text files and understand advanced I/O streams

Manipulate files, directories and file systems using the JDK7 NIO.2 specification

Apply common design patterns and best practices

Create Java technology applications that leverage the object-oriented features of the Java language, such as encapsulation, inheritance, and polymorphism

Execute a Java technology application from the command line

EXECUTIVE SUMMARY

Dear Mr. Srii Lalit Narayan Sir,

Thank you very much for giving us the opportunity to train students of Methodist College of Engineering Technology. As per our discussion please find the detailed schedule with topics which we will be covering during 10 day training program. The modules given below are based on those areas that require the greatest attention from the students appearing for campus placements. The program will require the attendance of the students for understanding concepts, practicing exercises, undergoing group activities, participating in tests, and attending review sessions online simulations. All students will be grouped into 1 batch. We assure that all the sessions will be very effective and our company person will be there to assist the trainers. Every student will undergo mock test and detailed analysis of their performance will be mailed to you on day to day basis.

Aptitude – Quantitative (QA)

- Trains
- Time & Work
- Permutation & Combinations
- Ratio & Proportions
- Pipes & Cisterns
- Probability
- Logarithms
- Aptitude – Reasoning (RA)
- Number Series
- Data Interpretation
- Blood relations
- Seating arrangement
- Cubes

Aptitude – Verbal (VA)
